Introduction

1.1 Purpose

The purpose of this document is to define and provide details for accessing API for ICEGATE (Indian Customs Electronic data interchange (EDI) Gateway) system information (e-filing services) from ULIP system.

This document details the following points:

1. **Data Integration between ICEGATE and ULIP web service:** Identification of operational points where data integration between ICEGATE and ULIP web service will be needed.
2. **Technical Approach** for performing Data Integration

The Overall Description

User will share the information such as **EGM number, BE number and shipping bill number** based on data send by user ULIP system will call respective **ICEGATE** API for accessing information.

Following are the point for accessing vehicle information: -

This API will share data based on information provided by user. ULIP will expose API for getting data from ICEGATE API.

1. **ICEGATE/01** API will take IGM and IGM date number from user and get data from ICEGATE API.
2. **ICEGATE/02** API will take BE number and date from user and get data from ICEGATE API.
3. **ICEGATE/03** API will take BE number and date from user and get data from ICEGATE API.
4. **ICEGATE/04** API will take Site id, IMO code, Vessel code, arrival data from user and get data from ICEGATE API.
5. **ICEGATE/05** API will take shipping bill number & date from user and get data from ICEGATE API.
6. **ICEGATE/06** API will take shipping bill number & date from user and get data from ICEGATE API.

7. **ICEGATE/07** API will take IGM number and IGM date from user and get data from ICEGATE API.
8. **ICEGATE/08** API will take EGM number and EGM date from user and get data from ICEGATE API.

1.2 Data Integration between ICEGATE System and ULIP application

User will share information to ULIP system based on data shared ULIP will provide data to user.

1.3 ICEGATE/01

This API will take **VCN number** and connect with ICEGATE API to get data.

| S. No. | Field Name | Field Description | Format | Required/Not – Required | Length |
|--------|--------------|--|------------|-------------------------|----------------|
| 1 | igmNo | vessel call number as available in ICEGATE system. | [0-9]{1,7} | Required | Min 1 Max 7 |
| 2 | igmDt | IGM date | [0-9]{8} | Required | Max 8 |

1.3.1 Technical Approach

1. All the data will be shared through rest web services.
2. ULIP system will provide **IGM number** for which detail is required.
3. ICEGATE API will share details of vessel information which exist in ICEGATE system in JSON format.
4. ICEGATE Integration will add JSON in **response** key in response body.
5. ULIP system will provide the data in JSON Object format in response body.

Example:

IGM number **2001362** is shared by ULIP system, then ICEGATE-integration will make a request to ICEGATE API.

Request:

The request must be of the following format

<https://www.ulip.dpiit.gov.in/ulip/v1.0.0/ICEGATE/01>

```
{"igmNo":"2001362","igmDt":"11102018"}
```

1.11 Data Transmission & Authentication Mechanism

All data exchange would be done over secure HTTP (HTTPS). Request from ULIP's system would be made in ICEGATE system through a data exchange URL that has following form:

<https://www.ulip.dpiit.gov.in/ulip/v1.0.0/ICEGATE/01>

Body:

```
{ "igmNo": "1234", "igmDt": "25102021" }
```

Access to above data exchange URL would be authorized by use of a security mechanism implemented by the ULIP system. It is as follows:

- First time access: It would require a username and password [which would be shared with user beforehand]. Once user hit with valid user id and password, ULIP system will return a basic authorization token to user, using that token user will communicate with ULIP system until token will not get expired.

Brief summary of HTTP Basic Authentication is as follows:

First time when User will hit ULIP secured API through username and password for access token as follow-

```
curl -X POST
'https://www.ulip.dpiit.gov.in/ulip/v1.0.0/user/login'
-H 'accept: application/json'
-H 'content-type: application/json'
-data '{"username": "xxxxxx", "password": "XXxxx@12345"} '
```

Authorization:

Bearer

```
eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJpbmRlcmNvbnQiLCJpYXQiOiJlODU1NjYyMzcsImFwchMiOiJkYXRhcHVzaCJ9.jb-23Dbkwpz-3ptsuuZofzH-ce7jd0xR5WLkFfBPO_Dzjop01dSx90amqsjsGUAryLUPtUDiMX07oHG4L2AffQ
```

Upon successful authentication, the user would be logged into the ULIP system and get an access token. Though this token user can communicate with ULIP. This token has expiry time which represent user session. The session time out for the same to be fixed hour, generally it is for 30 minutes. If there is no request coming from user for 30 minutes, then session (token) will be expired and user need to re authenticate.

Using The above token, user can request ULIP system for vehicle details as follow -

```
curl -X POST \
https://www.ulip.dpiit.gov.in/ulip/v1.0.0/ICEGATE/01 \
-H 'accept: application/json' \
```

```
-H 'authorization: Bearer

-H 'cache-control: no-cache' \
-H 'content-type: application/json' \
-H 'postman-token: 8e8a19a4-ea1e-6373-f616-e2e4af9a1338' \
-d '{"igmNo": "1234", "igmDt": "25102021"}'
```
